

Discussion Article 1*for January 27*

Read the paper “Why Most Published Research Findings are False” and at least one of the followups, as posted on the course web site.

Be prepared to discuss:

1. Why does the author state that most published research findings are false?
2. Be prepared to share one good point from the article, one point you disagree with, and one point you don't understand.
3. How do think this information should affect your role as a statistical consultant?
